

Ana Grigore

Assistant Principal - SENCO

With many years of experience as a SENCo, I have a strong record for supporting learners with a wide range of needs and coordinating the provision for learners with special education needs, in mainstream education. I completed my mandatory qualification - the National Award for SEN Coordination Post Graduate Certificate, I have also gained a Level 7 postgraduate certificate in Psychometric Testing and Assessment which enables me to promote a strong culture of inclusivity to learners with learning difficulties. As a specialist assessor, I am able to offer practical and reliable estimates of attainment and ability skills for a very wide range of learners both with or without special education needs. I also hold a Master's Degree in Education- Special Education Needs and Disability (Med SEND).

As a professional and as a parent, I have always instilled an inclusive practice attitude where no learner is less important than anyone else. I believe in what is fundamentally right for all our children: their right to mainstream inclusive education based on respect and equality at its core.
