

Denis Verdon

Denis has over 30 years' experience in cybersecurity, having worked in major financial services and consulting firms in the UK and the USA and has worked with organisations in 38 different countries. Starting as an apprentice programmer in a major bank, he since earned a BSc in Information Technology from Western Governors University in Utah (once the most accredited university in the USA) and gained his QTS and Post Graduate Certificate of Education from Teach First and Sheffield Hallam University.

Denis's passions extend from digital technologies and the sciences into classical and contemporary music and art. In his spare time, he enjoys reading, researching various scientific and historical topics and cooking, as well as learning jazz guitar and luthiery.
