

Maisha Zainab

Teacher of Science

Maisha has always had a love of learning, of reading and finding out more about the world around her and the people in it. The first in her family to attend higher education, Maisha has achieved a BSc in Clinical Pharmacology and a MSc in Cancer & Therapeutics. After graduation, Maisha worked as a Teaching Assistant for a year. She discovered she enjoyed being in the classroom, supporting students in building their knowledge by nurturing their curiosity. She looks forward to leading her own classes as a teacher of science and sharing her love for the subject with her students.
